### Company Presentation of MPO (Mécanique de Précision de l'Orléanais)

Founded in 1965 and located in Châteauneuf-sur-Loire, France, Mécanique de Précision de l'Orléanais (MPO) was a family-owned company specializing in precision CNC machining.

Acquired by the Castingpar group in 2020, MPO serves major industrial clients across the Eurozone. With 35 skilled employees and over 25 CNC machines, MPO operates on a 3370 m<sup>2</sup> site. The company handles orders from single units to medium series (1 to 10,000 pieces) and offers mechanical assembly services. Certified ISO 9001 and AS/EN 9100, MPO is committed to quality, innovation, and environmental sustainability.

### Activity Sector and Capabilities of MPO

MPO operates primarily in aerospace (20%), defense (65%), and industry (15%). In aerospace, MPO produces high-precision parts from materials like titanium, steel alloy and inconel, certified EN/AS 9100. The defense sector has grown significantly since 2020, with MPO collaborating with major industry players. In the industrial sector, MPO handles both standard and special machine productions. The company's advanced CNC capabilities include vertical and horizontal milling, as well as multi-axis turning, ensuring high-quality and flexible production.
